

10kV busbar cable specifications

Overview

Each wire is made with CCA material (Copper Clad Aluminum) with 90% Aluminum and 10% Copper. Aluminum should be from A00 grade with 99.8% purity. Copper should be Cu-ETP according to EN13599 and with purity of minimum 99. The maximum resistivity at 20°C shall be <0 . Medium-voltage switchgear 8DA/B is indoor, factory-assembled, type-tested, single-pole metal-enclosed, gas-insulated switchgear, for single-busbar and double-busbar applications, as well as for traction power supply systems. This document provides an overview of Intercable's product line of High Voltage extruded Busbars, the applicable geometry, attachment components as well as a summary of tests conducted per customer product validations. Holes are punched in the ends or mounting elements, which are protected from. The IEC 61439 standard applies to busbars, especially when they are part of low-voltage switchgear and control gear assemblies, e.
