

150 Cable Tray Dimensions

Article Overview

A 150 mm cable tray typically has a nominal width of 150 mm, with depth and side rail dimensions standardized according to DIN EN 61537, including perforated side rails and bottom for ventilation and cable support.

Standard Dimensions and Features

For a 150 mm wide cable tray (commonly referred to as WRL 150 or similar series):

- Nominal Width: 150 mm
- Depth (usable inside height): Typically ranges from 50 mm to 100 mm depending on the manufacturer and tray type
- Side Rails: Continuous perforated and beaded side rails for structural stability and cable fastening
- Bottom: Riveted or perforated with offset holes and cross beads for reinforcement and barrier strip attachment
- Material Thickness: Usually 1.0–1.5 mm for steel trays; stainless steel (AISI 316L) or aluminum options are available for corrosion resistance
- Accessories: Splice plates (e.g., WSV 150.500) and joint bars are used to connect sections securely
