

24-core fiber optic cable for smart buildings is customizable

Article Overview

Yes, 24-core fiber optic cables for smart buildings can be fully customized in terms of fiber count, length, connectors, jacket type, and ratings.

Customization Options

Fiber Count and Modality: You can order 24-core cables in multimode (OM1, OM2, OM3, OM4) or singlemode (OS2) configurations, with options for 1, 2, 4, 6, 8, 12, 24, 48 fibers, and more . **Connectors:** Common connector types include LC, SC, ST, FC, MTP/MPO, APC, UPC, and duplex configurations. Pre-terminated assemblies come with connectors already attached, reducing installation time . **Jacket Type and Rating:** Cables can be customized for indoor, outdoor, armored, plenum (OFNP), riser (OFNR), LSZH, or tight-buffered jackets. Some indoor/outdoor cables are suitable for open plenum ceilings and hydrostatic ceilings . **Length and Deployment:** Pre-terminated assemblies can be made to any length, from 10 feet up to 5,000 feet, and are available with fan-out lengths for easy termination. Cables over 100 feet are typically spooled for installation . **Mechanical Features:** Options include pulling eyes for easier installation, water-blocking aramid yarn for strength, UV-resistant jackets, and interlocking armor for mechanical protection in harsh environments .

Installation and Compatibility

- **Indoor/Outdoor Use:** Many 24-core cables are suitable for both indoor and outdoor installations, including underground conduits and multi-floor deployments
