

30-degree arched cable tray

Article Overview

A 30-degree arched cable tray is a bend fitting used to route cables smoothly around corners, available in materials like aluminum, steel, and fiberglass, and designed for secure, efficient cable management.

Overview

A 30-degree arched cable tray is a type of elbow or bend fitting that allows cable trays to change direction at a 30-degree angle while maintaining proper cable support and minimizing stress on the cables (). These fittings are commonly used in electrical, instrumentation, and communication systems to navigate around obstacles or structural elements.

Materials and Types

- Aluminum: Lightweight, corrosion-resistant, ideal for indoor and outdoor installations ().
- Galvanized or Stainless Steel: Provides higher strength and durability, suitable for heavy-duty or industrial environments ().
- Fiberglass (FRP/GRP): Non-conductive and corrosion-resistant, often used in chemical plants or offshore installations ().

Features

- Pre-punched holes: Many aluminum channel trays come with pre-punched holes for easy cable attachment without drilling, reducing labor and installation time ()....
