

8-core optical fiber fusion splicer

Article Overview

8-core optical fiber fusion splicers are specialized devices designed to splice multi-core fibers with high precision, and leading models include Fujikura 90S+, INNO View 8+, Sumitomo Type-82C+, COMWAY C10S v2, and TEKCN TC-600.

Overview

Fusion splicers for multi-core fibers, including 8-core types, are designed to align multiple fiber cores simultaneously to ensure minimal signal loss and high reliability. These splicers typically use core alignment technology, which is essential for multi-core fibers where precise core-to-core alignment is critical. They are widely used in telecom, FTTH, data centers, and R&D applications .

Leading Models

- Fujikura 90S+: Supports multi-core fibers, including 8-core, with fast splice and heat times, rugged design, and automated arc calibration .
- INNO View 8+: Designed for multi-core fiber splicing, offering high precision, portability, and smart features like cloud syncing and automated calibration .
- Sumitomo Type-82C+: Suitable for multi-core fibers, providing high-speed splicing, dual independent ovens, and reliable performance in field and lab environments .
- COMWAY C10S v2: Offers core alignment for multi-core fibers, fast splice/heat cycles, and durable construction for field use .
- TEKCN TC-600: Supports multi-core fiber splicing with automated alignment, rugged design, and long battery life for remote operations .
- JETFIBER H5: Another high-end model capable of handling multi-core fibers with p...
