

Aerial Cable Trays in North Africa

Article Overview

North Africa has a mature cable tray market with established suppliers offering ladder, perforated, and solid-bottom aerial cable trays made from steel, aluminum, and stainless steel.

Market Overview

The North African cable tray market, led by Egypt, Algeria, and Morocco, is relatively mature and consolidated, driven by energy infrastructure, urban development, and industrial modernization projects . Aerial cable trays are widely used to support insulated electrical cables for power distribution, telecommunications, and industrial automation, providing a rigid and safe structural system .

Types and Materials

Aerial cable trays in the region are available in several types:

- Ladder trays: Ideal for heavy-duty cables and long spans.
- Perforated trays: Allow ventilation and reduce heat buildup.
- Solid-bottom trays: Provide full protection against dust and moisture . Materials commonly used include:
 - Galvanized steel: Durable and corrosion-resistant.
 - Stainless steel: Suitable for harsh environments.
 - Aluminum: Lightweight and easy to install .
