

Algeria Protective Distribution Box

Article Overview

Protective distribution boxes in Algeria are available in various types, including waterproof, explosion-proof, and standard electrical enclosures, supplied by local companies like ELECAD, Plastelec, Electrissima, and STI Algérie.

Types and Features

Waterproof Distribution Boxes: These are typically made from ABS material, offering impact, heat, low-temperature, and chemical resistance, with excellent electrical performance. Many models have an IP65 protection rating, making them suitable for indoor and outdoor applications. They often include DIN rails, earth bars, and knockout plates for cable entry, allowing flexible installation and integration with circuit breakers and other electrical components .

Explosion-Proof and ATEX Boxes: For hazardous environments, companies like ELECAD specialize in ATEX-certified enclosures designed for areas with explosion risks. These boxes ensure industrial safety and protect critical sites while maintaining electrical continuity .

Standard and Industrial Distribution Boxes: Suppliers such as Electrissima and Plastelec provide a wide range of low and medium voltage distribution boxes, including molded case circuit breakers, transformers, contactors, and IACM/IAT panels. These products are used in industrial, commercial, and residential installations across Algeria .

Applications

Protective distribution boxes are used in:

- Electricity distribution networks for residential, commercial, and industrial sectors...
