

American Wire and Cable Distribution Box

Article Overview

The American Wire and Cable Distribution Box is a fully insulated, plug-in capable power distribution unit widely used in North American cable network systems.

Overview

The American-type cable distribution box is a cabling engineering device designed for power distribution networks, commonly used in industrial parks, residential areas, commercial centers, and high-rise buildings . It is known for its compact size, full insulation, and fully enclosed design, making it suitable for both indoor and outdoor installations .

Key Features

- **Circuit Configuration:** Typically divided into a 600A main circuit and 200A branch circuits. The main circuit uses bolt-fixed connections, while branch circuits are plug-in, allowing easy connection and disconnection with loads .
- **Busbar Arrangement:** Features a horizontal busbar layout for clear cable arrangement and efficient power distribution .
- **Safety and Durability:** Fully insulated and enclosed, resistant to dust, corrosion, and flooding, and maintenance-free .
- **Flexibility:** Supports up to 8 in-out wire branches, adaptable to various wiring requirements .
- **Additional Functions:** Branch circuits can act as load switches or isolation switches, and the box can be paired with cable fault indicators for rapid fault detection
