

Angola Offshore Price Optical Router QSFP28

Article Overview

QSFP28 optical transceivers in Angola range from around \$35 for short-reach third-party modules to several thousand dollars for OEM long-reach models, with CWDM4 and LR4 modules offering the most competitive pricing.

Product Overview

QSFP28 modules are 100G optical transceivers widely used in data centers and high-speed networking. A common example is the Mellanox MMA1L30-CM CWDM4 QSFP28, which supports 100Gb/s Ethernet over single-mode fiber up to 2 km, converting 4 channels of 25Gb/s electrical data into CWDM optical signals at 1310nm and vice versa, compliant with QSFP28 MSA and IEEE 802.3bm CAUI-4 standards (Angola Desertcart) . These modules include digital diagnostics via I²C and undergo rigorous production testing for reliability.

Pricing in Angola

- Third-party short-reach (SR4) modules: Approximately \$35, offering 100G connectivity at a very low cost per Gbps (around \$0.35 per Gbps) .
- CWDM4, LR4, FR1, LR1 modules: Mid-range, widely available, and highly competitive due to multiple suppliers. These are often the best value for 100G deployments .
- Long-reach ZR4 modules: Higher cost due to expensive optical components, often several hundred to over a thousand dollars per module
