

Are the cables in Norway fiber optic cables

Overview

A rapidly expanding network of submarine fibre optic cables has brought about a sea change in Norway's digital infrastructure. "In terms of connectivity, Norway used to be the final stop on the European network system. The project involves the construction of a new high-capacity fibre optic cable stretching from Trondheim to Alta. The initiative comes at a time of increasing tension in the High North. One cable | Smart cable solutions. The two optical fiber cable consist of two segments, from Harstad to Breivika in Andøy Municipality, and from Breivika to Hotellneset near Longyearbyen in Svalbard. Consequently, it is crucial for the. NOR5KE Viking is our 810Km subsea cable between Bergen and Trondheim, with a crosslink between Molde and Åndalsnes. The 192-fibre-cable is the only direct link between these cities, fully independent from existing fiber routes – thus provide much needed diversity for this region abundant with cheap.
