

Auxiliary tools for fiber optic cable laying

Article Overview

Auxiliary devices for fiber optic cable laying include cable pullers, tensioners, blowing machines, splicers, cleavers, cleaning kits, and protective conduits to ensure safe, efficient, and high-quality installation.

Cable Handling and Installation Devices

- **Cable Pullers and Tensioners:** Used to pull fiber optic cables through ducts, conduits, or trays while controlling tension to prevent fiber damage .
- **Cable Blowing Machines:** Employed for microduct installations, these machines use compressed air to blow fiber cables through ducts, reducing friction and stress on the fibers .
- **Breakaway Pulling Eyes and Automated Pullers:** Ensure safe attachment to the cable and maintain proper tension during installation .
- **Innerducts and Conduits:** Provide a smooth, protective path for fibers, preventing crushing or abrasion during and after installation .

Splicing and Termination Tools

- **Fusion Splicers:** Align and fuse fiber ends using an electric arc, creating a continuous glass path with minimal signal loss. Core alignment splicers are used for high-precision single-mode fibers, while cladding alignment splicers are suitable for multimode fibers .
- **Mechanical Splicers:** Join fibers without fusion, often used for temporary or less critical connections .
- **Fiber Cleavers:** Produce a flat, mirror-smooth end face on the fiber, essential for lo...
