

Average Price of Photovoltaic AC Combiner Box

Article Overview

The typical 2026 FOB China price for a standard PV AC combiner box ranges from approximately \$150 to \$400 per unit, depending on configuration, voltage rating, and quality certifications.

Price Overview

The cost of a PV AC combiner box is influenced by several factors, including the number of inputs (e.g., 6-in-1 or 8-in-1), voltage rating (400 V, 690 V, 800 V AC), IP protection level (IP65–IP67), and the quality of internal components such as fuses, SPDs, and circuit breakers. Standard configurations for string inverters in utility-scale systems typically fall within the \$150–\$400 FOB China range for 2026, with higher-end models or custom designs costing more.

Cost Breakdown

The main contributors to the price include:

- Internal DC/AC components (40–55%): SPDs, fuses, fuse holders, load-break switches, MCBs/MCCBs, and copper terminals.
- Raw materials (15–20%): Copper busbars, steel or high-grade plastic enclosures, and internal wiring.
- Enclosure and ingress protection (10–15%): IP gaskets, cable glands, UV-resistant coatings, and locks
