

B24 Fiber Optic Switch Zone Configuration

Overview

The `cfgcreate` command is used to create a new zone configuration on a Brocade switch. A zone configuration is a collection of zones that define access control between devices within a Fibre Channel fabric. The surface resistance prevents electrostatic charge. Cable entries can be selected individually from a range of. Fibre Channel zoning allows you to partition the Fibre Channel fabric into one or more zones. Welcome to subscribe "Shulou Technology Information " to get latest news. "The Fibre Channel Industry Association (FCIA) is a mutual benefit, non-profit, international organization of manufacturers, system integrators, developers, vendors, and industry professionals, and end users.
