

Benin Cable Tray Specifications and Dimensions Drawing

Article Overview

Cable tray systems in Benin follow standard international specifications for types, dimensions, materials, and fittings, with detailed drawings available for design and installation.

Cable Tray Types and Materials

Cable trays are available in several types to suit different applications:

- Ladder type: Open design for maximum ventilation, ideal for power and communication cables.
- Trough type: Solid or ventilated bottom for moderate cable protection.
- Solid bottom type: Provides full protection against dust and debris.
- Channel type: Smaller, for light-duty applications or short cable runs. Materials commonly used include hot-dip galvanized steel, bare galvanized steel, stainless steel, and aluminum, with surface treatments to prevent corrosion and ensure durability in industrial and commercial environments .

Standard Dimensions

Cable tray dimensions are standardized to ensure proper cable fill, heat dissipation, and structural integrity:

- Width (W): Typically ranges from 50 mm to 600 mm, depending on cable volume...
