

Bhutan Lighting Distribution Box Standard Model

Article Overview

The standard lighting distribution box in Bhutan is typically a ZBW-type prefabricated substation, designed for 10/0.4kV networks with rated frequency 50Hz, offering integrated high-voltage and low-voltage switchgear, transformers, and protection devices.

Overview and Usage

The ZBW□ type prefabricated substation is a complete distribution unit that combines high-voltage switchgear, distribution transformers, low-voltage switchgear, energy metering devices, and power factor compensation devices in one or multiple enclosures according to wiring schemes. It is widely used for urban high-rise buildings, residential communities, industrial sites, street lighting, hotels, airports, docks, and shopping malls in Bhutan, providing a compact, safe, and reliable solution for electricity distribution .

Technical Specifications

- Transformer Rated Capacity: 50–1600 kVA, depending on load requirements .
- Rated Frequency: 50 Hz.
- Protection Level: IP23D, suitable for outdoor installation with moderate environmental exposure .
- Environmental Conditions:
- Altitude ≤ 1000 m...
