

Broadcasting Optical Transmitter

Overview

A Fiber Converter Transmitter with broadcast-grade quality is designed to convert video, audio, and data signals into optical signals for transmission over fiber optic cables, ensuring superior performance and reliability for professional broadcast applications. Read more. The OT 5-5 CWDM optical transmitter is used to receive 4 SAT. The F-RF-1310-TX-32mW is a high-output RF over Fiber transmitter designed for demanding applications requiring extended reach and large optical distribution networks. Covering the full 45-1000 MHz RF spectrum, it enables the transport of complete CATV lineups and RF services over fiber. This is our latest high-end two-way output CATV network Fiber Optics Receiver. This module able to receive optical signals in either 1310nm or 1550nm. Trusted by broadcasters, system integrators and venues worldwide for over 30 years.
