

Cable tray costs in Eastern Europe

Article Overview

Cable tray prices in Eastern Europe typically range from \$1 to \$18 per meter, depending on material, type, and order volume.

Price Overview

Cable tray costs vary significantly based on material, design, and supplier. For 2026, typical price ranges are:

- Galvanized steel trays: \$0.80 to \$17.80 per meter, widely used for heavy industrial applications due to durability and load capacity .
- Aluminum trays: \$1.20 to \$5.00 per meter, favored for renewable energy projects and data centers because of lightweight and corrosion resistance .
- Plastic trays: Budget-friendly, generally under \$5 per meter, suitable for light-duty or indoor installations . The type of tray also affects cost: ladder trays are more expensive due to their ability to support heavy cables, while perforated or wire mesh trays are cheaper and ideal for lighter loads .

Factors Influencing Cost

- Material and Coating: Stainless steel resists corrosion but is pricier; hot-dip galvanized (HDG) steel is durable and moderately priced; powder-coated trays add color and wear protection but increase cost .
- Order Quantity: Bulk purchases reduce per-meter cost, especially for industrial projects .
- Installation and Labor: Skilled labor, welding, and cutting can add to total project costs, which vary by country and region
