

Cable tray installation in Laos

Article Overview

Cable tray connections in Laos are widely supported by local manufacturers and suppliers, with options including hot-dip galvanized (HDG) trays for durability in tropical conditions.

Types of Cable Trays and Connection Methods

In Laos, wire mesh, ladder, and solid-bottom cable trays are commonly used for electrical and industrial installations. Connections typically involve:

- Bolted joints: Standard method using nuts, bolts, and brackets to join tray sections securely.
- Splice plates: Metal plates that bridge two tray sections, providing structural stability.
- Support brackets and hangers: Used to connect trays to walls, ceilings, or other structures, ensuring proper alignment and load distribution.
- HDG coating: Hot-dip galvanized trays are preferred in humid and tropical environments like Laos to prevent corrosion and extend service life .

Local Suppliers and Manufacturers

Several companies in Laos provide cable trays and connection solutions:

- Huijue Laos: Offers a range of cable tray products and can be contacted directly for B2B supply .
- Watana Wire & Cable Company (WWCC): A leading local manufacturer supplying...
