

Cable tray installation on wall surface price

Article Overview

Cable tray installation along a wall typically costs between \$10 and \$100 per meter, depending on material, tray type, and installation complexity.

Material Costs

The cost of the cable tray itself varies significantly by material and design:

- Fiberglass-reinforced plastic (FRP): \$10–\$50 per meter, ideal for corrosive or high-moisture environments .
- Galvanized steel: \$2–\$25 per meter, balancing durability and affordability .
- Stainless steel: \$20–\$100 per meter, highly durable and corrosion-resistant, suitable for industrial or harsh environments .
- Aluminum: Lightweight and rust-proof, generally more expensive than steel . Tray type also affects cost:
 - Ladder trays: Open design, easier to install, better ventilation, often more economical for large installations .
 - Solid bottom or ventilated trough trays: Provide continuous support, better for smaller control or instrumentation cables, slightly higher cost .

Installation and Labor Costs

Installation costs depend on several factors:...
