

# Cable tray protective layer

## Overview

Cable tray insert liners are designed to fit snugly within cable trays, providing a protective layer that shields cables from potential damage caused by contact with the tray's material, usually metal. Is your cable tray system optimized for safety, dependability, space and cost savings?

Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. MP Husky offers a wide variety of cable tray covers to provide protection for the cables contained within the system from sunlight, environmental elements, dirt, debris, and falling objects. All of the covers listed here are used for indoor as well as outdoor applications. Whether you are working in high-traffic office spaces, corrosive industrial environments, or aesthetic-sensitive areas like hotels and shopping malls, the importance of selecting the right cable tray cover cannot be overstated. Cable tray covers are designed to maintain spacing or to keep cables in place when the tray is bent at the minimum bend radius for cables as they exit the bottom of the cable tray. All illustrations, descriptions and technical information included in this document are provided as indications and can vary from actual products. Cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. Cable tray is a structure for supporting and organizing cables. In this guide, you will learn about the different types of cable.
