

Cable trays should also have a separate bracket quota

Overview

Traditionally, it has been recommended to install brackets approximately every 1 to 1.5 meters along the length of the cable tray. When installing cable containment systems, such as cable trays, finding the right balance between structural support and cost efficiency is crucial. But it's also important to minimize, maintain spacing or to keep cables in place when the tray is ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray. Cable tray installation is often treated as a secondary activity on construction sites, but from real project execution experience, it is actually one of the. NEC Article 392 outlines the key rules for installing and maintaining industrial cable tray systems.
