

Central Asia Optical Cable Mass Production Plant

Article Overview

The Central Asia Optical Cable Mass Production Plant, named Osiyo Kabellari, is a private Uzbek-Tajik joint venture in Uzbekistan's Fergana region, set to produce high-capacity copper and aluminum wire for regional infrastructure and export.

Overview

The plant, Osiyo Kabellari, is located in the Dangara district of Fergana, Uzbekistan, on a one-hectare site. It is a private greenfield venture established by Uzbek entrepreneur Fatima Imomova and Tajik investor Shukhradzhan Ashurmatov, reflecting a growing trend of cross-border private sector industrial cooperation in Central Asia . The facility is financed entirely through \$10 million in direct foreign investment, with no public sector involvement.

Production Capacity and Products

The plant is designed to produce:

- 15,000 tons of copper wire annually
 - 1,700 tons of aluminum wire annually
- These products are critical for infrastructure, energy, and manufacturing supply chains. The facility also plans to export up to \$1 million of wire products to neighboring CIS countries, particularly Kyrgyzstan, in its initial phase
