

Chad Fireproof Cable Tray Price Quote

Article Overview

Fireproof cable tray processing costs in Chad vary depending on tray type, coating method, and supplier, typically ranging from \$20 to \$100 per meter for standard industrial trays, with customization and fireproof coatings affecting the final price.

Overview of Fireproof Cable Trays

Fireproof cable trays are metal or non-metallic channels designed to support and protect electrical cables while resisting fire and extreme temperatures. They are widely used in industrial facilities, commercial buildings, and critical infrastructure. The fireproofing process involves cleaning, rust removal, primer application, and fire-resistant coating, ensuring durability, corrosion resistance, and compliance with safety standards .

Factors Affecting Price

- **Material Type:** Steel, aluminum, or composite trays have different base costs. Aluminum trays are lighter but more expensive, while steel is cost-effective and durable .
- **Coating Method:** Powder coating or fire-retardant paint increases the price. Powder-coated trays provide extra protection and aesthetic appeal .
- **Tray Design:** Ladder-type, perforated, or solid-bottom trays vary in cost due to manufacturing complexity .
- **Customization:** OEM or ODM services, tray length, width, and load capacity influence pricing .
- **Shipping and Import:** For Chad, international shipping from suppliers in China or India adds to the cost, including customs duties and logistics
