

Checking the price of the electrical distribution box at home

Article Overview

The typical cost of a residential electrical distribution box ranges from \$150 to \$1,900, including materials and installation, depending on size, amperage, and features.

Price Breakdown

For a standard home installation, the cost depends on the panel size, amperage rating, number of breaker spaces, and enclosure type. Typical ranges include:

- Basic units: 100 A, indoor, 6-space panel with standard breakers, minimal wiring — \$800–\$1,000 including labor and materials .
- Mid-range units: 125 A, 12-space panel, upgraded breakers, some rewiring — \$1,400–\$1,800 .
- Premium units: 200+ A service upgrade, 16–22 spaces, outdoor weatherproof panel, specialty breakers, extensive wiring — \$2,800–\$4,000 .

Factors Affecting Cost

- Material and Construction: Plastic boxes are cheaper, while powder-coated steel or stainless steel enclosures increase the price .
- Internal Components: Empty boxes cost less; adding high-quality breakers, surge protectors, and busbars raises the price .
- Installation Complexity: Labor costs vary by region, accessibility, and whether rewiring or service upgrades are required
