

Chile Data Center EMS Anti-Trace Solution

Article Overview

Delta's EnviroStation EMS provides integrated environmental monitoring and security management for data centers in Chile, supporting traceability and operational oversight.

Overview of EMS in Chilean Data Centers

Chilean data centers are experiencing rapid growth, with over 60 facilities across the country, particularly concentrated in Santiago and Valparaíso, driven by cloud computing, AI, and big data demands. These centers require robust environmental and operational monitoring to ensure uptime, security, and compliance with industry standards.

Delta EnviroStation EMS Features

Delta's Environment Management System (EMS), known as EnviroStation, is designed to monitor and manage critical environmental conditions in data centers. Key features include:

- **Environmental Monitoring:** Tracks temperature, humidity, and water leakage to prevent equipment damage.
- **Security and Access Control:** Detects unauthorized entry and integrates alarms for fire, smoke, and other hazards.
- **Centralized Management:** Sends real-time data to a central manager via network,...
