

Companies that benefit from optical modules

Article Overview

Innolight is currently the company benefiting most from optical modules, with Eoptolink and Cisco also seeing significant gains.

Market Leaders and Growth

Innolight has emerged as a global leader in datacom optical modules, focusing on high-speed Ethernet transceivers for cloud data centers and telecom networks. In 2024, Innolight reported a 114% revenue increase, exceeding \$3.3 billion, and achieved record profitability by specializing in high-end optical modules such as 100G, 200G, 400G, and 800G for cloud and telecom customers . Its strategy of targeting the fastest-growing market segment—high-speed Ethernet transceivers—has widened the gap with competitors. Eoptolink also benefited substantially, reporting 175% growth in 2024 with revenues of \$1.2 billion, moving from #7 to #3 in the global TOP10 ranking . Like Innolight, Eoptolink focuses on high-speed Ethernet modules, serving major cloud companies, which has driven its rapid expansion and profitability. Cisco, through vertical integration and acquisitions such as Acacia and Luxtera, benefits from producing complex optical elements starting from low-cost materials. This approach allows Cisco to capture value across the supply chain and maintain a strong position in the optical module market .
