

# Congo Electrical Distribution Box

## Article Overview

Congo brand electrical distribution boxes are prefabricated units designed for safe, reliable, and efficient power distribution in residential, commercial, and industrial settings.

### Overview

Congo electrical distribution boxes, including 380V and ZBW-type prefabricated substations, are complete sets of distribution equipment that integrate high-voltage switchgear, distribution transformers, low-voltage switchgear, energy metering devices, and power factor compensation devices into one or multiple enclosures according to wiring schemes . They are widely used in urban high-rise buildings, residential communities, industrial plants, street lighting, airports, docks, and infrastructure projects .

### Technical Specifications

- Voltage and Frequency: Typically 10/0.4kV, 50Hz network .
- Transformer Capacity: Ranges from 50 kVA to 1600 kVA, depending on project requirements .
- Protection Level: IP23D, suitable for outdoor and indoor installations .
- Environmental Tolerance: Operates in ambient temperatures from -25°C to 40°C, relative humidity  $\leq 90\%$ , wind speed  $\leq 34$  m/s, and ice thickness  $\leq 20$ mm .
- Structural Features: Base frame welded from channel steel for high strength; enclosures made from composite materials with strong radiation resistance .
- Installation Requirements: Ground slope  $\leq 5^\circ$ , locations free from fire, explosion,...
