

Connecting to a new China Unicom fiber optic router

Article Overview

To connect a China Unicom fiber optic router, link the fiber cable to the ONT, connect the router via Ethernet, and configure network settings through the router's web interface.

Step 1: Prepare and Connect Hardware

- Locate the fiber optic wall outlet where your ISP's fiber line enters your home.
- Connect the fiber optic cable from the wall outlet to the Optical Network Terminal (ONT) provided by China Unicom .
- Power on the ONT and wait 2-5 minutes for the status lights to stabilize .
- Connect the ONT to your router using an Ethernet cable: plug one end into the ONT's LAN/Ethernet port and the other into the router's WAN port .
- Power on the router and wait for the indicator lights to confirm a successful connection .

Step 2: Connect Your Device

- Use a LAN cable to connect your computer directly to the router, or connect via Wi-Fi using the default SSID and password printed on the router label .

Step 3: Access the Router Web Interface

- Open a web browser and enter the router's IP address (commonly 192.168.1.1 or 192.168.0.1) in the address bar .
- Enter the default username and password from the router label. If you have chan...
