

Cost of Three-Way Cable Tray

Article Overview

A three-way cable tray typically costs between \$20 and \$100 per piece, depending on material, size, and finish.

Estimated Pricing

The cost of a three-way cable tray, which is a fitting used to branch cable runs in three directions, varies based on several factors:

- **Material:**
 - Hot-dip galvanized steel is common and durable, with fittings generally priced around \$20-\$50 per piece .
 - Aluminum is lightweight and corrosion-resistant, costing \$30-\$80 per piece .
 - Stainless steel is the most expensive, often used in harsh or hygienic environments, with prices reaching \$50-\$100 or more per piece .
 - Plastic or FRP (fiberglass) options are cheaper, typically \$15-\$40, but are suitable only for light-duty applications .
- **Size and Type:** Larger trays or those designed for heavy-duty cables will cost more. Ladder-type trays are generally more expensive than wire mesh or perforated trays due to their load-bearing capacity .
- **Coatings and Finishes:** Hot-dip galvanization, powder coating, or specialized corrosion-resistant finishes increase the price .
