

Data Center Interconnect Hot Aisle Dimensions

Article Overview

Hot aisle widths in data centers typically range from 0.9 to 1.2 meters, with maximum aisle lengths up to 16 meters, depending on accessibility and containment requirements.

Hot Aisle Width

- Minimum width: 0.9 meters to allow basic access and airflow management .
- Recommended width: 1.2 meters, which accommodates two full floor tiles between cabinet fronts for optimal airflow and serviceability .
- Ceiling height considerations: For ceilings above 3.7 meters, additional aisle width may be required to allow safe use of lifts for accessing overhead systems such as lighting, fire detection, and suppression equipment .

Hot Aisle Length

- Maximum continuous aisle length: 16 meters when both ends of the aisle are accessible .
- Restricted aisle length: 6 meters if one end is closed or lacks a personnel exit, ensuring safe access and evacuation .
