

Does anyone have a router that can connect to fiber optic internet

Article Overview

Yes, there are several high-performance routers designed specifically to handle fiber optic internet, offering multi-gig speeds, strong coverage, and advanced features.

Key Considerations for Fiber Routers

When choosing a router for fiber optic internet, consider the following:

- **Speed and Standards:** Look for routers supporting Wi-Fi 6 or Wi-Fi 7 to fully utilize fiber speeds, which can reach up to 5 Gbps or higher .
- **LAN Ports:** Ensure the router has multiple gigabit or multi-gig Ethernet ports for wired connections, with some models offering 2.5G or 10G ports for ultra-fast wired performance .
- **Coverage and Range:** Dual-band or tri-band routers provide better coverage and reduce interference, especially in multi-story homes or offices .
- **Security Features:** Many modern routers include built-in security suites to protect against malware, hackers, and identity theft .

Recommended Routers

- NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S)
- Speeds up to 1,900 Mbps for gaming, 4K/8K streaming, and AR/VR.
- Includes a one-year NETGEAR Armor subscription for enhanced security.
- Supports Wi-Fi Protected Setup (WPS) for easy device connection
