

Dominican fiber optic communication cable price

Article Overview

Fiber optic cables in the Dominican Republic typically cost between \$0.13 and \$6 per foot, depending on type, fiber count, and installation requirements.

Local Pricing Overview

In the Dominican Republic, mini ADSS aerial fiber optic cables and standard single-mode or multi-mode cables are available for various applications. Prices vary based on fiber count, construction, and protective features. For example, a 1-core FTTH drop cable costs around \$0.13 per foot, while a 288-strand backbone cable can reach \$6 per foot at retail, reflecting higher capacity and durability requirements. Bulk wholesale purchases may reduce costs to \$0.09–\$1.52 per foot.

Factors Affecting Cost

- **Fiber Type:** Single-mode fiber is generally cheaper per foot than multi-mode fiber but requires more expensive equipment for operation.
- **Strand Count:** Higher strand counts increase the price proportionally; for instance, a 12-strand cable costs about \$0.50 per foot, while a 24-strand cable can reach \$1.00 per foot.
- **Cable Construction:** Armored or plenum-rated cables designed for harsh environments or direct burial are more expensive, ranging from \$0.50 to \$5 per foot.
- **Installation Method:** Underground or complex installations incur higher costs than aerial or indoor runs
