

EU Wavelength Division Multiplexer Manufacturers

Article Overview

The European Union WDM market includes both domestic manufacturers and distributors, though the region remains heavily reliant on imports for core components.

Overview of the EU WDM Market

The EU WDM market is growing at a compound annual growth rate (CAGR) of 9–13% between 2026 and 2035, driven by data center interconnect (DCI) demand, telecom network modernization, and the transition to 400G and 800G coherent optics . Dense WDM (DWDM) accounts for 70–75% of the market value, while coarse WDM (CWDM) and filter-based WDM (FWDM) are used for metro and access networks . Despite this growth, the EU remains structurally import-dependent, sourcing 60–70% of basic WDM components from East Asia and North America .

Key EU Manufacturers and Suppliers

Several companies and distributors provide WDM modules and components within Europe:

- FS Europe: Offers FWDM filters based on thin-film filter (TFF) technology, widely used for optical network upgrades and amplifier integration .
- Technica: Supplies fiber Bragg gratings, Fabry-Pérot etalons, and tunable filters for DWDM systems
