

Earthquake-resistant cabinet 800mm depth

Article Overview

Seismic-rated cabinets with 800mm depth, such as the NavePoint 42U and KabinPLUS KS Seismic, provide robust earthquake protection for high-density server and networking equipment.

Key Options

1. NavePoint 42U Server Rack Cabinet (800mm Depth) The NavePoint Commercial Series 42U cabinet is designed for high-density applications and can hold a static load of 3000 lbs. It comes pre-assembled with heavy-duty locking casters and leveling feet for stability during seismic events. The cabinet features adjustable square cage nut mounting rails, perforated doors for airflow, and full-height cable management options. Its 800mm depth accommodates standard 19-inch equipment while maintaining seismic resilience . 2. KabinPLUS KS Seismic Rack Cabinets KabinPLUS KS cabinets are engineered for Zone 4 earthquake environments, offering a robust anti-seismic core construction. They include single front and split rear doors, tool-free transferability, and ventilation with 85% perforation. Cable management is facilitated through multiple roof and side entry slots with brushes. The cabinets comply with Telcordia GR-63-Core and NEBS Zone 4 standards, ensuring structural integrity during strong seismic events . 3. Eaton SmartRack Seismic Cabinets Eaton's SR42UBZ series is seismic-certified for Zone 4, with a maximum internal depth of 94 cm (approx. 37 inches), which is slightly deeper than 800mm. These cabinets support high-density server and networking setups, with adjustable mounting rails, perforated doors, and tool-less accessory installation. They are designed for environments pro...
