

Ecuadorian Access Switch SFP

Article Overview

Access switches in Ecuador with SFP/SFP+ ports are widely available for enterprise and SMB networks, offering high-speed fiber uplinks, PoE support, and cloud-managed options.

Overview of Available Switches

In Ecuador, several distributors and brands provide access switches equipped with SFP or SFP+ ports for fiber connectivity:

- Ecuacomp offers Layer 2 managed switches with 8 Multi-Gigabit ports (2.5 Gbps) and 2 SFP+ uplinks at 10 Gbps, suitable for high-performance Wi-Fi access points or 4K CCTV systems. Larger models include 48 Gigabit ports with 4 SFP+ uplinks, supporting PoE+ and centralized cloud management via Ruijie Cloud, ideal for corporate networks and IP surveillance .
- TECNIT provides a range of switches including Huawei eKIT S220 series, with 24 or 48 Gigabit ports and 4 SFP+ 10G uplinks, supporting PoE+ for powering cameras, access points, and VoIP phones. These switches are rack-mountable and allow advanced Layer 2 management for traffic optimization and network stability .
- Omada Networks (TP-Link) offers cost-effective Access Series switches with fanless designs for noise-sensitive environments, multiple PoE models, and SFP uplinks for flexible indoor and outdoor deployments .
- Utepo provides 48-Port Gigabit switches with 4 10G SFP+ uplinks, fully managed with Layer 3 features, supporting IPv4/IPv6 routing, Virtual Switch Framework (VSF) for switch virtualization, and fiber distances up to 40 km depending on the SFP module used. These are suitable for campus, enterprise, and FTTH networks
