

Estonian Imported Butterfly-Shaped Drop Cable 2 Cores

Article Overview

A 2-core butterfly-shaped FTTH drop cable is a flat, low-bend-sensitivity fiber optic cable designed for high-speed, reliable fiber-to-the-home connections.

Key Features

Structure and Design: The cable has a flat, butterfly-shaped design with two parallel Fiber Reinforced Plastic (FRP) strength members on either side of the optical fibers, providing crush resistance and durability . The fibers are positioned centrally, ensuring protection and optimal signal transmission. Its low-bend-sensitivity fiber allows for high bandwidth and excellent communication performance, even in tight bends or complex indoor routing .

Cores and Fiber Type: This cable contains 2 optical fibers, typically single-mode (G.657.A2 standard), suitable for FTTH applications . Some variants may use G652D fibers, depending on supplier specifications . The fibers are color-coded and tightly buffered for easy identification and handling.

Sheath and Safety: The cable is sheathed with LSZH (Low Smoke Zero Halogen) material, making it fire-safe and environmentally friendly for indoor installations . The non-metallic FRP members also provide lightning protection and anti-electromagnetic interference, enhancing reliability in various environments .

Performance and Applications:

- Ideal for FTTH networks, connecting wall boxes, terminals, and ONUs directly to homes or offices .
- Suitable for indoor and outdoor use, including ducts and riser installations
