

# Estonian distribution box model

## Article Overview

Estonian distribution boxes are modular, low-voltage electrical panels designed for residential, commercial, and industrial applications, with models from manufacturers like Könnér & Söhnen, EWJ, and Eltech Solutions OÜ.

### Overview

Distribution boxes in Estonia serve as central hubs for safely distributing electricity across multiple circuits. They house protective devices such as circuit breakers, fuses, and grounding bars, ensuring protection against overloads, short circuits, and electrical faults. These boxes are designed for both indoor and outdoor use, with rugged enclosures to withstand environmental and mechanical impacts.

### Key Models and Features

- Könnér & Söhnen Distribution Boards: Suitable for up to 7 device groups with a maximum current of 32A. They include integrated sockets for direct equipment connection, overcurrent protection, and grounding bars. Models are available for residential, construction, and industrial use, offering portability and water resistance for construction sites.
- ABB System pro E and ESB-System: Modular systems for low-voltage main distribution, ideal for industrial and large commercial applications. These systems allow flexible assembly of control and automation components, with reinforced encl...
