

Fiber Optic Cable Brand Registration Requirements

Article Overview

Registering a fiber optic cable brand requires compliance with CE/UKCA marking, RoHS, CPR, ISO certifications, and proper documentation of product conformity.

Regulatory Compliance

CE Marking (EU): Active fiber optic components such as optical amplifiers, media converters, and powered network devices must bear CE marking under the Low Voltage Directive 2014/35/EU and RoHS Directive 2011/65/EU. Passive components like patch cables, splice boxes, and connectors generally do not require CE marking, but all declarations of conformity must be digitally available for at least 10 years, accessible via QR code or URL on the product or packaging . **UKCA Marking (UK):** Following Brexit, fiber optic cables sold in Great Britain must comply with UKCA marking, confirming adherence to UK Building Regulations and relevant British Standards . **Construction Products Regulation (CPR):** All cables permanently installed in buildings in the EU must comply with CPR (EU No 305/2011). Manufacturers must provide a Declaration of Performance (DoP), which is linked to the CE label on the product or packaging . **RoHS Compliance:** Fiber optic cables must meet the EU's Restriction of Hazardous Substances limits, ensuring no harmful materials like lead or mercury are present .
