

Fiber Optic Cable Monitoring System Manufacturer

Article Overview

Leading manufacturers of fiber optic cable monitoring devices include FEBUS Optics, NKT, GLSUN, and LANCIER Monitoring, offering solutions for real-time integrity, temperature, and acoustic monitoring.

FEBUS Optics

FEBUS Optics specializes in distributed fiber optic sensing (DFOS) systems, including Distributed Acoustic Sensing (DAS) and Distributed Temperature Sensing (DTS). Their FOGGrid solution provides continuous real-time monitoring of buried or overhead cables, detecting temperature changes, cable strain, and third-party intrusions. Devices like the FEBUS A1 (Rayleigh, DAS) and FEBUS G1-R (Brillouin, DTS) offer precise, localized measurements over long distances, with the ability to extend coverage using Range Extension Modules. Their systems are compatible with existing supervision platforms and optimize both CAPEX and OPEX for cable networks (FEBUS Optics) .

NKT

NKT provides cable monitoring solutions for both onshore and offshore applications. Their systems integrate fiber optic sensing technologies with real-life operational knowledge to monitor cable health, performance, and security. NKT uses real-time temperature sensing and vibration monitoring to detect anomalies such as overheating, excavation risks, or third-party interference. DAS technology is employ...
