

Fiber Optic Cable Raw Material Company

Article Overview

Leading companies supplying raw materials for fiber optic cables include Corning, YOFC, Sumitomo Electric, and Dekam Optical, providing high-purity silica, optical preforms, specialty fibers, and polymer coatings.

Key Raw Materials for Fiber Optic Cables

Fiber optic cables rely on a combination of specialized materials to ensure high-speed, low-loss, and durable performance:

- Core & Cladding: Ultra-pure silica (SiO_2) with germanium doping to control the refractive index, forming the light-transmitting core and surrounding cladding .
- Coatings: Dual-layer UV-cured acrylate coatings (soft primary + hard secondary) protect the glass fiber from mechanical stress .
- Identification: UV-cured color inks for fiber identification in multi-fiber cables .
- Ribbon Matrix: UV-curable resin for ribbon cables, maintaining stability during high-speed extrusion .
- Strength Members & Armoring: Materials like FRP, aramid yarn, or steel provide tensile strength and protection against environmental stress .
- Protective Jackets: Polymers and specialized chemical repellents enhance durability and water resistance .

Leading Raw Material Suppliers

- Corning Inc.: A pioneer in optical fiber technology, Corning manufactures high-purity glass and optical fibers, including SMF-28® single-mode fiber, and supplies e...
