

Fiber optic cable box connector socket

Article Overview

A fiber optic cable box socket is an indoor termination point that securely connects and manages fiber optic cables, supporting adapters like SC, LC, and FC for residential or office networks.

Overview

A fiber optic cable box socket, also known as a fiber wall socket, optical outlet, or FTTH/FTTD wall plate, serves as the interface between the service provider's network and the end-user's equipment. It provides a secure, dust-proof, and organized termination point for fiber optic cables, ensuring minimal signal loss and protecting delicate fiber splices .

Key Features

- **Adapter Compatibility:** Supports standard SC simplex, LC duplex, and FC adapters, allowing flexible network configurations .
- **Cable Management:** Built-in storage for excess fiber, maintaining proper bend radii to prevent signal degradation .
- **Protection:** Dust covers and robust polycarbonate casing safeguard internal pigtails and adapters from physical damage and contaminants .
- **Flexible Installation:** Multiple cable entry points and ergonomic design simplify wall mounting and routing of fiber cables .
- **FTTH/FTTD Ready:** Optimized for Fiber-to-the-Home or Fiber-to-the-Desk deployments, supporting drop cable termination, splicing, and pigtail connections
