

Fiber optic cable deployment price

Overview

Cost ranges for laying fiber optic cable vary widely based on ground conditions, required trench depth, and whether the project is urban or rural. Typical total project ranges run from about \$8,000 on small, simple runs to over \$60,000 for longer, heavily regulated deployments. Fiber-optic cable materials typically cost \$1 to \$6 per linear foot, depending on fiber count and cable type. Commercial building installations with 100-200 network drops generally range from \$15,000 to \$30,000. Single-mode fiber costs less per foot than multimode fiber, but it requires more. The 2025 Fiber Deployment Cost Annual Report, produced by the Fiber Broadband Association and Cartesian, provides the industry's most comprehensive benchmark of fiber build costs across the U. 50 per meter, depending on several variables. Advanced options, such as photonic glass fiber optics, which utilize microstructured cores to enhance.
