

Fiber optic cable procurement price increases

Overview

Fibre optic prices have increased sharply from late 2025, driven by two structural demand shifts — military drone programmes consuming fibre at scale, and AI data centre build-out driving hyperscale procurement — against a supply base that cannot respond quickly due to the. Fibre optic prices have increased sharply from late 2025, driven by two structural demand shifts — military drone programmes consuming fibre at scale, and AI data centre build-out driving hyperscale procurement — against a supply base that cannot respond quickly due to the. Input costs for fiber optic cable are adding upward pressure on fiber optic cable prices at a time when demand for fiber technology is high and expected to continue growing. High fiber optic cable prices may threaten the financial feasibility of information communication technology (ICT). Since early 2026, the fiber optic cable price has been rising at an extraordinary pace. In some cases, suppliers only guarantee quotations for the same day, and in extreme situations even half-day quotations are appearing in the market. Over the past several months, upstream material costs and supply chain constraints have pushed fiber prices upward, directly impacting cable assemblies, patch cord production, and passive optical components. As an essential component in global telecommunications, defense, and AI infrastructure, prices for products like g657a2 fiber, single mode fiber, and bare fiber have seen dramatic increases since late 2025. A2. From late 2025 through the first quarter of 2026, the global fiber optic cable market experienced one of the sharpest and most unexpected price surges in its history. 652D fiber, bend-insensitive G. 657A2 grades have all seen dramatic increases.
