

Fiber optic cables can be directly connected to a soft router

Overview

What you cannot do is plug the fiber optic cable directly into a normal router. This is the part that trips people up. Fiber optic technology represents a revolutionary advancement in connectivity, transmitting data via pulses of light through thin strands of glass or plastic fibers. This method enables significantly faster speeds and greater stability compared to traditional copper-based connections. According to. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. This specialized equipment serves as the. Fiber internet sounds like an entirely different technology from the cable or DSL connections most people grew up with — and in some ways, it is.
