

Function of OPGW junction box

Overview

Joint boxes are weatherproof splice closures that mount on transmission towers and connect OPGW cable sections. They protect fiber optic splices from moisture and environmental damage, manage excess fiber storage for future maintenance, and maintain signal integrity across the line. The aluminium alloy joint box are applicable for connection protection of special optical cables, with the functions of direct and branch connection, with the maximum of. Aluminium Pipe Type (OPGW AP) – in which fibers are placed inside an PVC and aluminum pipe that provides both protection and conductivity. The procedure for preparing OPGW cables for. The Optical Ground Wire and Joint Box is an unsung hero among the maze of cables, towers, and cutting-edge technology. OPGW has dual functions of aerial ground wire and fiber communication. The anchoring of the joint box.
