

Greek Large Core Fiber ADSS

Overview

3 Fiber Count 96 CORES Fiber Type Single-mode/G625D Strength Member Material FRP/ARMID YARN Jacket Color Black Outer/Inner Sheath Material LSZH Installation Method Aerial Warranty Period 25 years Product Description

Attribute Value Item no. AFL-ADSS® (All-Dielectric Self-Supporting) cable is ideal for installation in distribution as well as transmission environments. All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements. It is used by electrical utility companies as a communications medium, installed along existing overhead transmission. In the realm of aerial fiber optic infrastructure—where cables must withstand harsh weather, high voltages, and mechanical stress— ADSS (All Dielectric Self-Supporting) fiber optic cables stand out as a game-changer. This type of cable does not need a messenger to support it, so it can be installed in a single pass.

ADSS Fiber Optic Cable

GL FIBER" ADSS cable Using A-grade fiber core, the attenuation and dispersion characteristics are fully optimized, and precise geometric parameters ensure low splicing loss and high splicing efficiency.

OverviewConstruction detailsAccessories and installationApplication issues

All-dielectric self-supporting (ADSS) cable is a type of optical fiber cable that is strong enough to support itself between structures without using conductive metal elements. It is used by electrical utility companies as a communications medium, installed along existing overhead transmission lines and often sharing the same support structures as the electrical conductors. ADSS is an alternative to OPGW and OPAC with lower installation cost. The cables are designed to be s...

All-dielectric self-supporting cable

ADSS is an alternative to OPGW and OPAC with lower installation cost. The cables are designed to be strong enough to allow lengths of up to 700 metres to be installed between support towers.

Oct 31, 2025

All-dielectric Self-supporting cable (ADSS) with Enhanced All ...

A large number of cores; lightweight; can be erected on the same tower with the power line; saving resources. Construction and maintenance are convenient, power cut is not needed most of the time. ...

Sep 07, 2025

AFL-ADSS® (All-Dielectric Self-Supporting) fiber optic cable is a non ...

As its name indicates, there is no support or messenger wire required, so installation is achieved in a single pass, making ADSS an economical and simple means of building a fiber optic network.
