

High Temperature Resistance Export Price for UPS Power Systems

Article Overview

High temperature UPS systems are available in a wide range of KVA ratings, with export prices varying by capacity, features, and supplier, typically sourced from manufacturers in China, India, and the Philippines.

Overview of High Temperature UPS Systems

High temperature UPS systems are designed to operate in extreme conditions, with operating ranges from -37°C to $+74^{\circ}\text{C}$ for some models and -30°C to $+65^{\circ}\text{C}$ for industrial on-line UPS units. They are available in single-phase and three-phase configurations, with power ratings from 1 kVA to 100 kVA, and include features such as hot-swappable batteries, extended backup hours, LED indicators, surge protection, and temperature-compensated charging. Applications include data centers, telecom, medical facilities, industrial plants, military, and outdoor installations.

Export Market and Pricing

Global export data indicates that China is the largest exporter of UPS systems, followed by the Philippines and India, with thousands of shipments annually. Export prices depend on KVA rating, phase type, and additional features:

- Small industrial UPS (1-6 kVA): Typically range from \$500 to \$2,000 per unit, depending on customization and battery type.
- Medium UPS (10-40 kVA): Prices generally range from \$5,000 to \$15,000 per unit,...
