

High-precision manufacturer of adjustable attenuators for operator backbone networks

Overview

Orbis Systems' high-precision RF programmable attenuators deliver automated, adjustable RF attenuation for 5G, OTA, and complex multi-path testing with superior accuracy and repeatability. Available in multiple termination configurations these components exhibit excellent performance characteristics for the most demanding RF/Microwave applications Available in both. Qorvo offers a broad portfolio of variable attenuators with digital or analog control operating up to 50 GHz. Broadband SMA attenuators are constructed from stainless steel and provide excellent stability and VSWR. Products include N-type attenuators, 50-ohm. Attenuators from VIAVI offer a complete range of power-balancing options, from fixed to variable optical attenuators in field, lab, and manufacturing environments.
