

Household metal electrical box distribution box

Article Overview

A household all-metal electrical distribution box is a robust enclosure that safely houses circuit breakers, RCDs, and other protective devices, providing organized and secure distribution of electricity throughout a home.

Overview

An all-metal distribution box (also called a metal consumer unit or breaker panel) is designed to distribute electrical power from the main supply to multiple circuits in a home while ensuring safety and durability. The metal construction offers enhanced mechanical strength, impact resistance, and long-term durability, making it ideal for residential environments where protection against accidental contact, fire, or physical damage is critical.

Key Components

Typical components inside a household all-metal distribution box include :

- Circuit Breakers (MCBs): Protect individual circuits from overloads and short circuits.
- Residual Current Devices (RCDs) or RCBOs: Provide protection against electric shocks and leakage currents.
- Bus Bars: Conduct electricity to multiple circuits; includes neutral and grounding bars....
