

How does Congo act

Article Overview

The Republic of the Congo operates as a presidential republic with strong executive authority, a multiparty system, and centralized control over security and governance.

Political System and Governance

The Republic of the Congo is a presidential republic where the president serves as both the chief of state and head of government, appointing the Council of Ministers and holding significant decision-making power . The country has a bicameral legislature, consisting of the Senate and the National Assembly, with members elected for six-year and five-year terms, respectively . The 2015 constitution allows the president to serve three five-year terms, and the position of Prime Minister was reinstated, creating a semi-presidential system . Congo has a multiparty system, with over 100 political parties, though the Congolese Labor Party (PCT) and its allies dominate government positions and legislative seats, controlling most senior roles . Ethnic divisions exist, and while discrimination is legally prohibited, enforcement is inconsistent, and the president's group often plays a prominent role in politics .

Legal and Judicial System

The judiciary is independent in principle, with a Supreme Court, Courts of Appeal, and a Constitutional Court handling constitutional matters . The president nominates Supreme Court judges based on recommendations from the Higher Council of Magistrates, and judges cannot be removed arbitrarily . The legal system is supported by consultative bodies and local councils in the country's 12 administrative regions, reflecting a decentralized governance structure
